

bright  
+ cheerful

Principal designer Kristine Paige Kamenstein of Jackson Paige Interiors, shows *Adore Home* through her bright and sunny office space.

**What's your occupation?**

I am an interior designer. My firm specialises in high-end residential design.

**What do you primarily use your office for?**

My office is used solely for running my interior design business. We fabricate floor and furniture plans, we create storyboards for clients and fulfill all our orders.

**What's your favourite piece of furniture in your home office?**

I love my white lacquer desk. It is clean and fresh, which inspires me to try to keep it clear by keeping up with paperwork, (which isn't always easy)!

**Describe your decorating style.**

My personal style is quite transitional. I love the clean lines of contemporary furnishings, but I appreciate the quality, pedigree and craftsmanship of fine antiques.

**Biggest splurge and best budget buy for your office?**

The biggest splurge was the white lacquer desks and storage cabinets. My best budget buy was our yellow pendant lights from West Elm. I love the splash of colour. ■

## Kristine's top five tips

**Kristine shares her tips  
to creating a clean and  
modern home office.**

- 1** Choose a colour palette and don't stray from it. Having the same colours throughout will create a sense of cohesiveness, calm and serenity.
- 2** Choose desk accessories that are useful and attractive. You'll want to put your mail away if you have a stylish letter holder.
- 3** We love trays! Place all your small desk accessories on a tray of the same material. It keeps everything looking clean and organized.
- 4** Maintain your files! We have a large file cabinet for our loads of records, but for files we need to access on a daily basis, we have small white one-drawer cabinets within reach of our desks.
- 5** Frame inspirational images or past accomplishments - at the end of a long day, looking at them will keep you motivated.
